Designed, Manufactured, & Supported In The U.S.A.

Our products are built at our Richmond, Texas HQ with U.S. and global components. We utilize high-precision, modern manufacturing techniques such as CNC machining, injection molding, multi-layer PCB etching, and more to achieve robust, high-quality results. Every AgDrone undergoes rigorous QA before shipping, ensuring dependable performance for every customer. Hylio's products are fully NDAA-compliant. We source critical electronic components (as defined by US Govt.), such as processors and radios, from U.S. and allied suppliers, making our UAS legal, safe, and secure for government and private use.

SOFTWARE

Unified Command

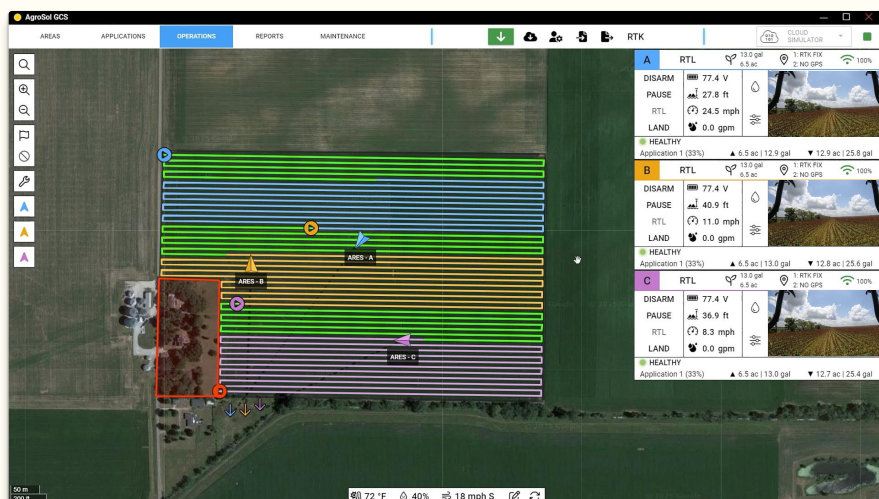

Fly up to 3 drones simultaneously from one GroundLink with real-time sensor monitoring and both autonomous and manual controls at your fingertips.

Precision Mapping

Intuitively plan applications using drag/import boundaries and select from a variety of application modes such as broadcast, spots, zones, perimeter, variable rate, and more.

All-In-One Enterprise

Comes with built-in tools for agronomic analysis, automated FAA/EPA compliance reporting, billing, work and team management, asset and maintenance tracking in one system.

HARDWARE | GroundLink

- ✓ 13.3" Sunlit Readable 1000 nits, 10-Point Touch Display
- ✓ Command up to 3 drones per GroundLink
- ✓ Wireless Connectivity: Wi-Fi 6E, Bluetooth, 4G LTE, GPS
- ✓ NDAA-compliant
- ✓ Designed and built in-house.
